The manuscript of a full paper that includes tables, figures, etc. should not exceed fifteen typed pages, while that of a short communication should not exceed six pages.

The manuscript should contain the following subtitles in sequence; Title, Abstract, Keywords, Introduction, Materials and Methods, Results and Discussion, Acknowledgements, if any, and References. These sub-titles, however, will not be present in case of **Short communication**.

Title: Title of the paper should be brief and specific. The authors should prepare the manuscript in such a way that there should be a title page with only the title of the paper, the names and address of the authors, and running head on it. The second page should carry the title of the paper with Abstract to be followed by Introduction, etc. without author's name.

Abstract: It should not exceed 200 words. It should include only the gist of the paper, i.e., just the results. Abstract is not the summary and, in any case, it should not contain the subject of the materials and methods and/or any descriptive part of the paper.

Keywords: Should not exceed 6 words.

Introduction: It should be concise and include relevant literature and define clearly the objective of the study.

Materials and Methods: Special/standard methods should be cited only as references and should not be described except for the modification which should be stated. No sub-heads should be used.

Results and Discussion: The section should include precise statement of results obtained, figures, tables, and discussion.

Table, Graphs and Figures: The paper should contain minimum number of tables, graphs, and figures. However, these should be typed separately. Table title should be on the top of the table and be written as **Table 1**. Caption for the figures graphs and graphs should be on the bottom of the figure and be written as **Fig. 1**. The same data should not be used in both the tables and figures or graphs. The graphs and figures should be drawn in indelible ink on tracing paper and properly be labeled with the help of a letter set. The figures and graphs should be properly labeled with bold, solid lines so that these can stand reduction up to half or less of the original. The photographs should be submitted on glossy paper. Legend of the graphs and figures should be typed and given separately at the end of text. The references in the text should be arranged chronologically. Units of measurement to be used: $\mu\text{E}/\text{m}^2/\text{sec}$, mg/l, kg/ha, etc.

The journal authority will bear the cost of black and white photographs. The authors (s) will have to pay the cost if color photograph is needed.

The references and scientific names are extremely important. The authors must be sure about the correctness of citations and spellings.

Citation style: In the text, references should be cited within brackets quoting author's surname and the year of publication in the appropriate place. Two or more references when put within the same bracket should be separated by a comma. Units of measurements to be used as SI units.

FG conceived of the study and participated in its design and coordination. All authors read and approved the final manuscript.
